DEPOSIT CONTROLLER SYSTEM with REACTION CHAMBER

ITEM NUMBER & PRODUCT DESCRIPTION:

CASE/PACK

TWT-5C8-460-FGRC

Residential/ Light Commercial Deposit Control System with food grade PVC Reaction Chamber for Water-Fed Appliances (For pipes 1/2" or less)

1

TWT-5C8-472-FGRC

Residential/ Light Commercial Deposit Control System with food grade PVC Reaction Chamber for Water-Fed Appliances (For pipes 3/4" or less)

1

TWT-5C8-473-APVC

Residential/ Light Commercial Deposit Control System with PVC Reaction Chamber for Water-Fed Appliances (For pipes 1" or less)

1

TWT-5C8-473-ST

Residential/ Commercial Deposit Control System with Stainless Steel Reaction Chamber for Water-Fed Appliances (For pipes 1" or less)

1

Contractors, Dealers, distributors, Wholesalers Price List Available Upon Request
Resale and/or tax ID Number Required
All quotes and /or price list request must be submitted via fax or email

Copper Pipe Signal Enhancer – For Copper Pipe Applications Only

**ITEM NUMBER &
PRODUCT DESCRIPTION:**

**CASE
PACK**

TWT-CSE-0227

Designed for Copper Pipes 2" or Less in Diameter

2

TWT-CSE-0229

Designed for Copper Pipes 4" or Less in Diameter

2

TWT-CSE-0227K

KIT DESCRIPTION & COMPONENTS

1

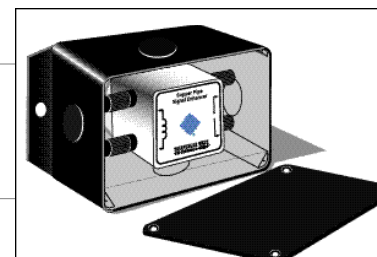

For installation of copper pipes up to 2" only

- 1- 1 CSE black housing box with pre-mounted CSE unit, and 4 pre-drilled 1/2" holes for easy assembly and installation. CSE kit may be mounted vertically or horizontally. Box dimensions: 5.5"W x 4.25"H x 1.75"D
- 2- 4 connectors for CSE housing box, controller and solenoid connections
- 3- 2 plastic hole plugs (cover remaining holes)
- 4- 1 15' length of flex tubing for connection from housing box to deposit controller
- 5- 1 10' length of flex tubing from housing box to onsite solenoid connection
- 6- 1 extra 55' extra spool of wire

TWT-CSE-27LP70M

Copper Pipe Signal Enhancer Housing & Unit
Components #1 and #3 above only

2

TWT-CSE-0229K

KIT DESCRIPTION & COMPONENTS

1

For installation of copper pipes up to 4" only

- 1- 1 CSE black housing box with pre-mounted CSE unit, and 4 pre-drilled 1/2" holes for easy assembly and installation. CSE kit may be mounted vertically or horizontally. Box dimensions: 6.1"W x 4.6"H x 2.4"D
- 2- 4 connectors for CSE housing box, controller and solenoid connections
- 3- 2 plastic hole plugs (cover remaining holes)
- 4- 1 15' length of flex tubing for connection from housing box to deposit controller
- 5- 1 10' length of flex tubing from housing box to onsite solenoid connection
- 6- 1 extra 55' extra spool of wire

TWT-CSE-29LP70M

TWT BYPASS TREATMENT SYSTEMS *(custom quote only)*

ITEM NUMBER & PRODUCT DESCRIPTION:

CASE/PACK

TWT-BP-RC-1A

Factory assembled 1-inch pipe solenoid with Deposit /Ionization Control Unit and recirculating pump for use with recirculating water systems Designed to treat up to 1,650 gallons per hour
This unit Wall Mounts [w/Ionization]

1

TWT-BP-RC-1B

Factory assembled 1-inch pipe solenoid with separate Deposit Control and separate Ionization Unit and recirculating pump for use with recirculating water systems. Designed to treat up to 1,650 gallons per hour
This unit Wall Mounts [w/Ionization]

1

TWT-BP-RC-1C

Factory assembled 1-inch pipe solenoid with separate Deposit Control and separate Ionization Unit for use with recirculating water systems Designed to treat up to 1,650 gallons per hour.
This unit Wall Mounts [w/Ionization]

1

TWT-BP-RC-2

Factory assembled 2-inch pipe solenoid and recirculating pump for use with recirculating water systems. Designed to treat up to 4,800 gallons per hour
This unit is Floor Mounted [w/Ionization]

1

TWT-BP-RC-4*

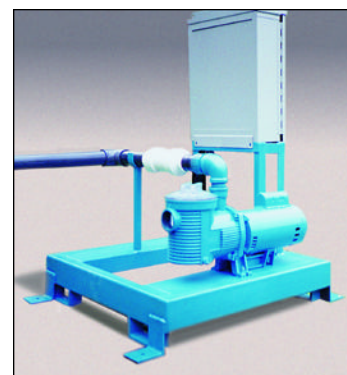

Factory assembled 4-inch pipe solenoid and recirculating pump for use with recirculating water systems. Designed to treat up to
This unit is Floor Mounted

1

TWT-BP-RC-6*

Factory assembled 6-inch pipe solenoid and recirculating pump for use with recirculating water systems. Designed to treat up to 43,000 gallons per hour
This unit is Floor Mounted

1

*Custom System Quote: Industry specific fluid treatment needs and up grades
Custom Installation: Pricing to be established based upon proposal submitted at time of sale based on materials cost at time of purchase

Note: Above systems are fully integrated and factory assembled and mounted, offering end to end fluid management and treatment solutions

***36,000-85,000 gallon systems prices upon request.**

**** Custom System Quote:** Industry specific fluid treatment needs and up grades
Custom Installation: Pricing to be established based upon proposal submitted at time of sale based on materials cost at time of purchase

NOTES:

For facilities with multiple treatment needs and applications, contact TWT for specific installation and special pricing guidelines

Pricing case by case, must take into consideration:

- Shipping/ Handling/ Insurance • Installation/Cost (time frame)
- Additional equipment needs (reinstallation)
- Any additional charges (redistribution point) • Consulting time, etc.

Quote: Order based on price of material at time of purchase

Contractors, Dealers, distributors, Wholesalers Price List Available Upon Request
Resale and/or tax ID Number Required
All quotes and /or price list request must be submitted via fax or email

View and/or Download Section B-3 of Catalog (home page) for Additional Technical Information

CUSTOM ENGINEERED & INTEGRATED (Fork Lift Skid-Mounted) HIGH VOLUME FLUID TREATMENT SYSTEMS (For potable, process and/or waste water applications)

TWT® PATENTED DEPOSIT CONTROL TECHNOLOGY • UV DISINFECTION/PURIFICATION

ITEM NUMBER	VOLUME GPM'S:	CASE PACK
-------------	---------------	-----------

TWT-CSMS-G2T-404-5007	400/600 GPM Treatment System	1
------------------------------	-------------------------------------	----------

Unit Dimensions Approximate:

48" W x 65" D x 55" H

Treatment System

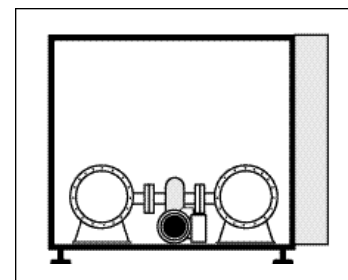

TWT-5C8-404 Deposit Control System

TWT-UV-5007 Disinfection/Purification Systems

Efficiency:

Expected 3 Log Reduction (99.9) for drinking water

Expected 1–2 Log Reduction for wastewater applications

TWT-CSMS-G4T-406-5007	700/1200 GPM Treatment System	1
------------------------------	--------------------------------------	----------

Unit Dimensions Approximate:

48" W x 65" D x 55" H

Treatment System

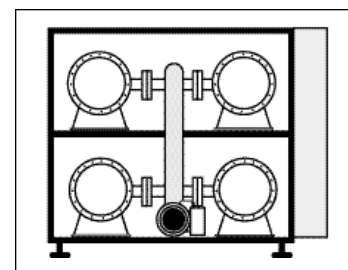

TWT-5C8-406 Deposit Control System

TWT-UV-5007 Disinfection/Purification Systems

Efficiency:

Expected 3 Log Reduction (99.9) for drinking water

Expected 1–2 Log Reduction for wastewater applications

TWT-CSMS-G6T-408-5007	1300/1500 GPM Treatment System	1
------------------------------	---------------------------------------	----------

Unit Dimensions Approximate:

48" W x 65" D x 75" H

Treatment System

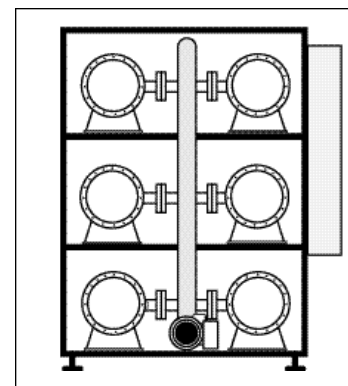

TWT-5C8-408 Deposit Control System

TWT-UV-5007 Disinfection/Purification Systems

Efficiency:

Expected 3 Log Reduction (99.9) for drinking water

Expected 1–2 Log Reduction for wastewater applications

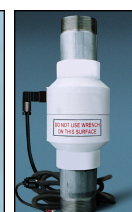

Note: Above systems are fully integrated and factory assembled.

Custom Orders: Larger pipe size (GPM) applications available upon request

TWT Inc. recommends that an initial supply of replacement products e.g., UV lamps etc. be stored at owners facility at all times, that will insure uninterrupted service and treatment. Review product list for replacement filters and ultra-violet lamps.

Upgrades: Customized TWT® systems to meet your treatment applications available upon request

Quote: Order based on price of material at time of purchase

Contractors, Dealers, distributors, Wholesalers Price List Available Upon Request

Resale and/or tax ID Number Required

All quotes and /or price list request must be submitted via fax or email

IONGUARD IONIZATION & PURIFICATION SYSTEM for POOLS / SPAS / HVAC

System Consists of: TWT Control Unit & TWT ID Electrode Installation Kit

ITEM NUMBER & PRODUCT DESCRIPTION:	CASE/PACK
---------------------------------------	-----------

TWT-5C8-277

0.5 AMP control unit (for pipes up to 2" or less)
Ionization/Disinfection System for the control of
Algae/ Bacteria. *Designed for pool sizes upto
40,000 gallons

1

TWT-5C8-278

1.0 AMP control unit (for pipes up to 4" or less)
Ionization /Disinfection System for the control of
Algae/ Bacteria. *Designed for pool sizes upto
80,000 gallons

1

Multiple units may be used in series for larger volume pools

BioGard DEPOSIT CONTROL IONIZATION, CONDITIONING & TREATMENT SYSTEM

TWT-5C8-40277

Integrated System—0.5 AMP Control Unit
(for pipes up to 2" or less)

1

TWT-5C8-40478

Integrated System—1.0 AMP Control Unit
(for pipes up to 4" or less)

TRANSPORTABLE WATER TREATMENT SYSTEMS WITH MULTI-STAGE MICRO-FILTRATION, DEPOSIT CONTROL AND ULTRA-VIOLET DISINFECTION

ITEM NUMBER & PRODUCT DESCRIPTION:	GPM	CASE PACK
---------------------------------------	-----	--------------

TWT-UV-20 Disinfection System	20	1
-----------------------------------------	----	---

TWT-UV-40 Complete Disinfection System	40	1
--------------------------------------------------	----	---

TWT-UV-60 Complete Disinfection System	60	1
--------------------------------------------------	----	---

TWT-UV-75 Complete Disinfection System	75	1
--------------------------------------------------	----	---

TWT-UV-200 Complete Disinfection System	200	1
---------------------------------------------------	-----	---

TWT-UV-60

Component List

1. Stainless Steel Base Skid
2. One H.P. pump with a 50 ft.Head, self priming
3. One strainer basket
4. Two 10 micron bag filters
5. One stainless steel 30" carbon filter
or One 40" stainless steel carbon filter for UV 40/60
6. One #90 Hurricane 5 micron filter
7. One #90 Hurricane 1 micron filter
8. One UV 5000 disinfection subsystem
9. One chlorine injector (optional)
10. TWT deposit control subsystem

TWT-UV-200

Skid Size:

Skid size is approximately 48"X66" crated, and ready to hook onto inlet and outlet with quick connect couplings. Unit is crated to fit into the airplane cargo compartment.

The TWT-UV-40 (40 GPM), TWT-UV-60 (60 GPM), TWT-UV-75 (75 GPM) , TWT-UV-220 (200 GPM) are the same in operation, just proportionally larger.

Custom Installation: Pricing to be established based upon proposal submitted at time of sale *based on materials cost at time of purchase

Quote: Order based on price of material at time of purchase

Pricing case by case, must take into consideration:

- Shipping/ Handling/ Insurance • Installation/Cost (time frame)
- Additional equipment needs (reinstallation)
- Any additional charges (redistribution point) • Consulting time, etc.

Contractors, Dealers, distributors, Wholesalers Price List Available Upon Request
Resale and/or tax ID Number Required

TWT-RO300G-FL

These systems are similar in appearance but have different capacities

TWT recommends that filters be purchased in sets of two in order to ensure uninterrupted fluid treatment

Reverse Osmosis: Removes the entire spectrum of drinking water contaminants

Reverse osmosis systems include membrane separation, activated carbon absorption and conventional, filtration to reduce the entire spectrum of contaminants that can be found in water. RO systems substantially remove heavy metals, such as barium, cadmium, chromium, lead and mercury; radium 226 / 228 selenium, cysts, chlorine, salts, turbidity and more.

If your application requirements are not listed, contact TWT® Inc. directly for further product information
